

VISITOR MANAGEMENT SYSTEM

Analysis & Digital Transformation

Turning a manual, fragmented process into a fast, secure, data-driven experience

Prepared by **Allulu Alkheraiji** · Business Analyst

Executive Presentation · Business Analysis Engagement · v1.0

WHERE WE'RE GOING

Agenda

01

The Business Problem

What's broken in visitor handling today

02

Stakeholders & Current State

Who is affected and how the as-is process works

03

Pain Points & Root Cause

The evidence and the underlying driver

04

The Proposed Solution

A digital Visitor Management System

05

Benefits, KPIs & Dashboards

The quantified case and how we'll measure it

06

Roadmap, Risks & Recommendation

How we deliver and what we ask for

WHY WE'RE HERE

The Business Problem

No single, digital, auditable way to manage visitors

Visits are coordinated through email, phone calls, instant messages, paper logbooks, and disconnected spreadsheets — with no source of truth.

- ✓ Long, unpredictable waits at reception
- ✓ Hosts tied up coordinating and escorting
- ✓ Security blind to who is on site
- ✓ Records scattered and not auditable
- ✓ No data on volumes, peaks, or no-shows

12–18 min

to process one visitor at peak

4+ hours

typical visit approval cycle

60–70%

estimated security compliance

Zero

reliable visitor data for reporting

WHO IS AFFECTED

Stakeholder Landscape

Visitor

Low influence · High interest

Wants a fast, professional arrival

Employee Host

Med · High

Invites and escorts the visitor

Receptionist

Med · High

Verifies, issues passes, assists

Security Officer

High · High

Screens and monitors presence

Facilities Team

Med · Med

Owns reception operations

Operations Team

High · High

Owns process & SLAs

Executive Mgmt

High · Med

Sponsors & consumes reporting

All

Data consumers

Reliable visitor insights

HOW IT WORKS TODAY

Current Process (As-Is)

Average end-to-end: **approval > 4 hours** · **reception processing 12–18 min** · **no record of who is on site**

THE EVIDENCE

Pain Point Analysis

PROBLEM	BUSINESS IMPACT	SEVERITY
No real-time visitor visibility	Security blind to who is on site	Critical
Inconsistent identity checks	Compliance only 60–70%	Critical
Slow, informal approvals	Cycle exceeds 4 hours	High
Manual reception registration	12–18 min per visitor	High
Fragmented request channels	Requests lost or duplicated	High
Inaccurate, dispersed records	Audit & traceability gaps	Medium
No reporting or analytics	No baseline to improve	Medium

WHY IT HAPPENS

Root Cause Analysis

5 Whys

- 1 Visitors wait — reception registers each one by hand
- 2 No pre-registration or arrival notification exists
- 3 There is no shared system to capture visits in advance
- 4 The process grew informally and was never digitized
- 5 **Visitor handling was treated as admin, not a managed process**

Contributing Causes (Fishbone)

People

No owner; manual coordination

Process

No intake, no SLA, no pre-reg

Technology

No VMS; email & spreadsheets

Data

Dispersed; no analytics

Environment

Single congested reception

Measurement

No KPIs ever tracked

Root cause: the absence of an owned, digital, end-to-end visitor process — visitor handling was never treated as a managed business process.

THE PROPOSAL

Digital Visitor Management System (To-Be)

Online Registration

Hosts pre-register; visitors self-complete via link

Visit Scheduling

Single, recurring & group visits

Approval Workflow

Auto-routed with reminders & escalation

Automated Alerts

Email & SMS at every stage

QR-Code Pass

Unique, contactless visitor pass

Digital Check-In/Out

Self-service kiosk or QR scan

Real-Time Tracking

Live on-site list + over-stay alerts

Dashboards

Executive, operations & security views

THE NEW JOURNEY

Future Process (To-Be)

Mostly automated

Verified & screened

Always visible

Fully measured

Every step that was manual, untracked, or invisible in the as-is process is now digital, automated, and measured.

THE PAYOFF

Expected Benefits — Before vs After

Time per visit (minutes)

Security compliance

↓ ~85% less processing time

↓ >80% faster approvals

↑ +25–35pt compliance gain

★ 4.3/5 satisfaction target

Benchmarked against comparable enterprise VMS deployments. Targets validated against measured current-state performance.

HOW WE MEASURE SUCCESS

KPI Framework

Check-In Time

< 2 min

Approval Time

< 30 min

Processing Time

< 5 min

Security Compliance

> 95%

No-Show Rate

< 10%

Satisfaction

≥ 4.3/5

Total Visitors

Tracked

Reporting Coverage

3 dashboards

REPORTING

Three Role-Based Dashboards

Executive DASHBOARD

- ✓ Total visitors & trend
- ✓ Peak visit hours
- ✓ Visits by department
- ✓ Period-over-period view

Operations DASHBOARD

- ✓ Pending approvals
- ✓ Today's upcoming visits
- ✓ Processing-time gauge
- ✓ No-show rate

Security DASHBOARD

- ✓ Live on-site count
- ✓ Expired / over-stay passes
- ✓ Security alerts
- ✓ Watch-list flags

Built in Power BI · filters for date, site, department, host & visit type · full visual mockup in the dashboard deliverable

HOW WE DELIVER

Roadmap & Key Risks

Phased Delivery

- 1 Discovery & Design**
Confirm requirements, workflows, integrations
- 2 Pilot — Single Site**
Configure, test, train, validate KPIs
- 3 Refine**
Tune workflows from pilot feedback
- 4 Scale Roll-Out**
Extend to all sites & entrances

Top Risks & Mitigation

Low user adoption

Early involvement, training, simple UX

Med

Integration issues

Early discovery, phased, manual fallback

Med

Data privacy / consent

Privacy-by-design, retention rules

Low

Scope creep

Baseline + change control

Med

Security resistance

Co-design, pilot, show visibility gains

Med

RECOMMENDATION

Approve a single-site pilot of the digital Visitor Management System

Endorse the business case & assign an executive sponsor

Mandate Operations as the process owner

Fund the pilot and a 90-day KPI baseline

~85% faster processing · >80% faster approvals · >95% security compliance
